
Coronavirus: Working Safely

Chris Gregory

Aaron Fisher

(HM Inspectors of Health & Safety)

Aims

- HSE Response
- Spot Inspections
- October health Campaign

Getting Covid Secure

- Step 1 - carry out a COVID-19 risk assessment in line with HSE guidance
- Step 2 - develop increased cleaning, hand washing and hygiene procedures
- Step 3 - take all reasonable steps to help people work from home
- Step 4 - maintain 2m social distancing where possible
- Step 5 - where people cannot be 2m apart, manage transmission risk
- Construction Leadership Council – SOP v5

HSE Response to Covid

- Outline of phone inspections and site visits etc
- Concerns

Spot Inspections

Spot Inspections

“Some of the common issues HSE inspectors are finding include: failing to provide arrangements for monitoring, supervising and maintaining social distancing, failing to introduce an adequate cleaning regime – particularly at busy times of the day – and providing access to welfare facilities to allow employees to frequently wash their hands with warm water and soap.”

Spot Inspections

- Track and Trace & positive cases
- Face Coverings – when should they be worn?

Enforcement

- Same as other risk areas – verbal advice, NoCs & Notices
- Proactive PRs

Health Campaign

- 5th-30th October
- Respiratory risks (Silica, wood dust)
- Expectations

Summary

- Guidance available through the CLC-site operating procedures & HSE website
- Other safety risks must still be managed effectively
- Communication
- October health campaign
