Introduction

The **Mock Trial** will help you and your employees understand the law enforcement process and how companies and their people from senior management down can get caught up and caught out. Knowing how it works and what is involved can help you prepare and protect your interests if a serious health and safety incident were to occur. However, prevention is best!

The **case** involves a fall from height, something that could occur in virtually any and every business. Whose acts or omissions will be found to have contributed to the accident? Who will be found guilty? What will the penalties be? Will anyone go to prison?
